

Key Performance Indicators	Year 5 Milestones - Computing
Algorithms and Programming	I can design and create programs that use algorithms to achieve given goals. (A)
	I can declare and assign variables. (P)
	I can use loops in a program. (P)
	I can design, write and debug modular programs using procedures. (P)
Data and Data Representation	I can identify the difference between data and information.
	I know why sorting data in a flat file can improve searching for information.
	I can use filters or perform single criteria search for information.
Communication and Networks	I can identify the difference between the internet and internet service (e.g. World wide web).
	I know what is acceptable and unacceptable behaviour when using technologies and online services.
	I can identify the difference between the internet and an internet service.
Information Technology and Use of Applications	I can collect, organise and present data and information in digital content.
	I can create digital content to achieve a given goal through combining software packages and internet services to communicate with a wider audience.
	I can make appropriate improvements to solutions based on feedback received and can comment on the success of the solution. ( ALL UNITS )
